

NTC COURSE SUMMARY

NICET Sprinkler Inspection & Testing Training

Are you NICET Certified? NICET Certification is a widely accepted, cross-industry recognized certification of professional competency. It has been a requirement in many states and on many projects for those involved in inspection and testing of sprinkler system—and more states and organizations adopt the requirement every day!

NICET Certification is a very valuable certification but is also a very difficult certification to attain. Even professionals with years of experience in the sprinkler industry will struggle to achieve their certification goals. NTC's NICET Sprinkler Inspection & Testing Training is designed to make the certification and examination process simpler and easier.

NTC's NICET Sprinkler Inspection & Testing Training is intended for the sprinkler professional. This course covers certification procedures and requirements, testing strategies, and NFPA code books. Students attending this course will develop a strong understanding of sprinkler inspection and testing, including the requirements of NFPA 25 (Standard for the Inspection, Testing, and Maintenance of Water-based Systems).

This is a practical applications based training course. The information covered in this training directly applies to everyday work in the industry. This course provides students with in depth information on code compliance and proven standard practices for the industry. Throughout this course, there is an emphasis on safety, professional ethics, and doing the right thing. Those who attend this training will be better prepared to meet the professional challenges of the low voltage industry.

Students will receive a copy of the NTC Black Book (Sprinkler Certification Guide) Students also receive 90 days access to Training Department (online self-study) to further review content covered in class and to access practice exams to gauge their readiness for the NICET exam.

NICET Sprinkler Inspection & Testing Training

Course Description

Course Title: NICET Sprinkler Inspection & Testing Training

Course Type: Generic technical training

Intended Audience: Low voltage contracting company employees (installation, service, technical sales)

Course Length: 8 hours

Course Description:

This eight hour training course provides an in-depth look at NICET Certification. The highlights of this training include the importance of NICET Certification, testing strategies, NFPA 25, and actual subjects which provide a foundation for the test. Additional, this course provides a detailed overview of the Standard for the Inspection, Testing, and Maintenance of Water-Based Fire Protection Systems).

Course Objectives:

1. Understand what NICET Certification is
2. Understand the importance of NICET Certification
3. Understand NICET testing strategies
4. Understand how to use NFPA 25
5. Understand NICET testing subjects

NICET Sprinkler Inspection & Testing Training
